

# Local Government Reserves

Dataset

August 2009

## **Local Government Reserves**

**Local Government Reserves** are those areas created by subdivision under the Local Government Act and described on the Sealed Plan as follows:

- Public Open Space
- Public Recreation Space
- Set Apart for Drainage Purposes
- Set Apart for the Public to enter....
- Drainage Reserve Dedicated as Park
- Set Apart for a Public Garden

The Local Government Authority becomes the responsible authority for the management of these reserves upon registration of the Sealed Plan, although in some instances, the owner recorded on the title is still in the subdivider's name.

**Local Government Reserves** have been derived from the CadArea (Cadastral Area) table within the LIST Cadastral Datamodel, based on a selection from their CadType category.

The **Local Government Reserves** dataset is intended to be used in conjunction with the **Cadastral Parcels** dataset. These **Local Government Reserve** polygons will have a corresponding topologically matched polygon in the Authority Land – (Local Government) classification of the **Cadastral Parcels** dataset. This matched polygon will hold the standard attributes of that dataset including Title and PID reference, if appropriate.

## Local Government Reserves - Data Structure

**Formats available:** MAPINFO TAB; ESRI SHAPE

**Datum:** GDA94

**Projection:** MGA94 Zone 55

**Geometry:** Polygon

The following attributes are included:

Field	Type	Description
CID	INT32	Cadastral Persistent Identifier – The unique database identifier for each cadastral polygon
CATEGORY	CHAR(60)	The category of the feature as defined on the Sealed Plan
FEAT_NAME	CHAR(60)	The official name of the feature if applicable as recorded in the State's Nomenclature Register
COMP_AREA	DECIMAL (16,3)	The computed area of the region in square metres
MEAS_AREA	DECIMAL (16,3)	The area recorded in the plan that depicts the region in square metres
UFI	CHAR(12)	Unique Feature Identifier – a unique identifier attached to every representation of a feature instance within The LIST
FMP	CHAR(12)	Feature Metadata Pointer – a code relating to information on lineage and accuracy of each feature
CREATED_ON	CHAR (19)	Date which the region was created in the CadArea table. Format YYYY-MM-DD HH:MM:SS

GSB Use only - Extraction parameters

Retired\_on: null

Status: 0

Cad\_type: 14
