Points of Interest

The **Points of Interest** dataset is a spatial point dataset representing the location of a number of service, cultural, community and government organisations. The data is classified by a COM_TYPE1 value for the following primary classifications:

- Accommodation
- Church
- Club
- Commonwealth Government
- Community Care
- Council
- Cultural
- Education and Training
- Financial Institution
- Ground
- Hall/Community Centre
- Medical Service
- Sports complex
- State Government
- State police and Emergency Services
- Tourist Feature
- Transport

The COM_TYPE2 value provides a sub classification i.e for Church – Anglican, Baptist, Catholic etc.

The Name records the feature name.

This dataset is primarily used to record and display those features of interest that are depicted on the TASMAT Tasmanian Towns Street Atlas, although some features outside the coverage of the Atlas are still recorded. The data is periodically revised generally to co-incide with revisions of this publication and may not necessarily be complete or current at any one time. As data may be supplied by a number of organisations, there is no guarantee of the accuracy of this.

Points of Interest - Data Structure

Formats available: MAPINFO TAB; ESRI SHAPE

Datum: GDA94

Projection: MGA94 Zone 55

Geometry: Point

The following attributes are supplied:

Field	Type	Description
COMFAC_ID	INT32	Community Facility ID – A unique ID for every feature within this dataset
PID	INT32	The Property Identifier which is the identifier for the Valuer-General's VISTAS property Valuation data base
COM_TYPE1	CHAR(60)	The Community Facility primary classification type
COM_TYPE2	CHAR(60)	The Community Facility sub classification type
NAME	CHAR(100)	The Name of the Feature
UFI	CHAR(12)	Unique Feature Identifier – a unique identifier attached to every representation of a feature instance within The LIST
FMP	CHAR(12)	Feature Metadata Pointer – a code relating to information on lineage and accuracy of each feature
CREATED_ON	CHAR (19)	Date which the region was created in the CadArea table. Format YYYY-MM-DD HH:MM:SS
